

Material

Large stocks of corrugated are kept in our extensive warehouse, immediate availability enables just in time deliveries.

Design

Recent installation of the latest cad system linked directly to a sample cutting table allows samples to be produced within minutes.

Modern versatile machinery and a dedicated workforce ensures the smooth running of orders and the capability of achieving fast turnarounds whilst maintaining the highest quality standards. Deliveries are made in our own vehicles ensuring the goods arrive in good condition and on time.

“We would rather explain the value of quality than have to apologise for something less.”

**DESIGNERS AND MANUFACTURERS OF
CORRUGATED CASES AND PACKAGING**

MARSHALL LANGSTON LIMITED

CORRUGATED CASES & PACKAGING

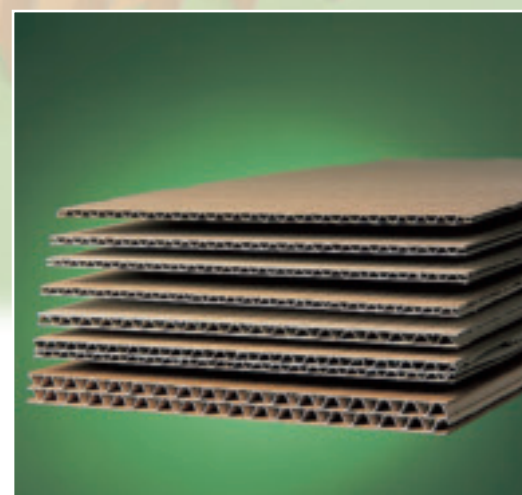

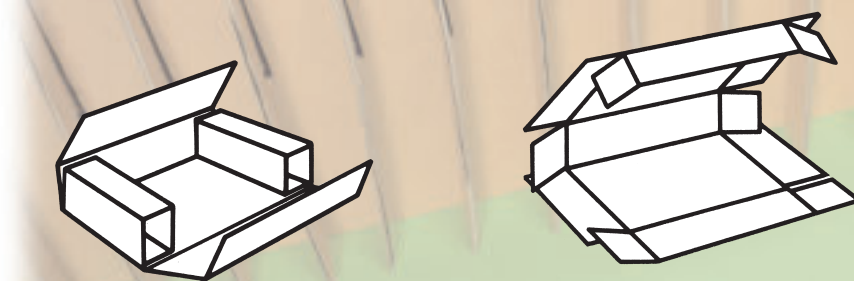

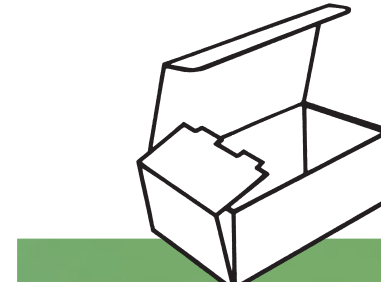

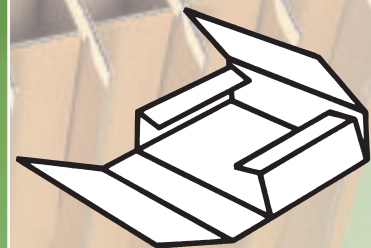

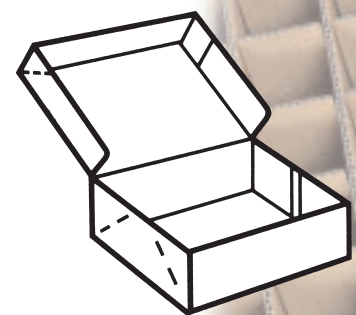

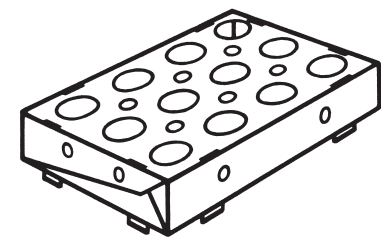

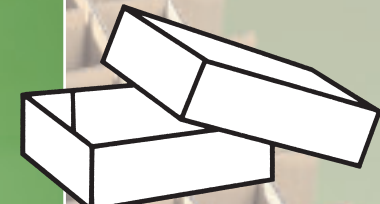

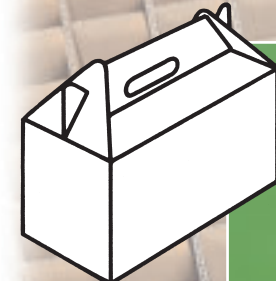

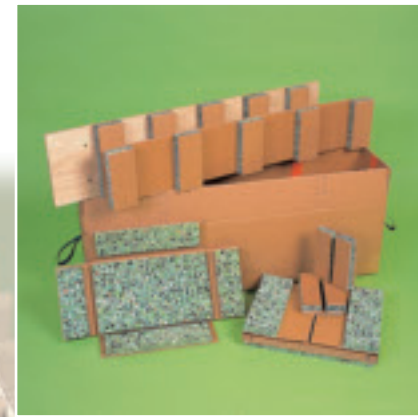

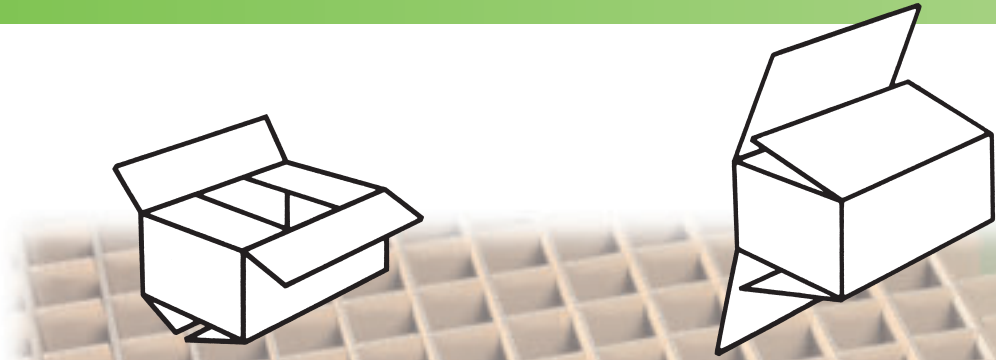

The Company

Established in 1966 this independent family owned business is still committed to producing corrugated containers made to the size and quantity that the customer wishes to purchase, no minimum order limit and a flexibility that gives an honest customer first policy. This has resulted in Marshall Langston's successful progression. Moving to purpose built freehold premises in the late 1980's and continued investment in new machinery will maintain our position as an important supplier of corrugated packaging and enable further long term partnerships to be formed with our customers, whether large or small.

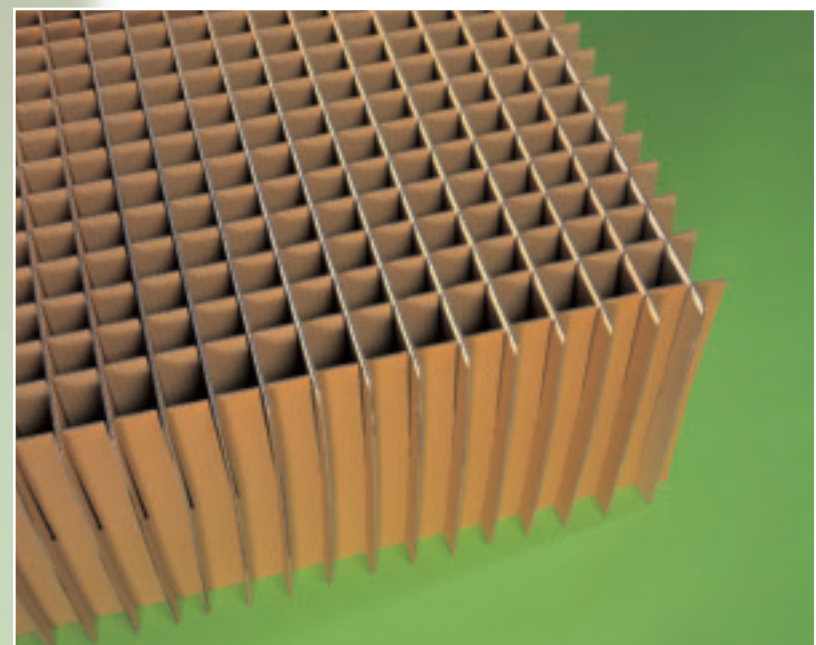

The Products

Fitments designed specifically for customers requirements.

Please note that as with the true nature of bespoke packaging the images shown in this brochure are intended to give an indication of what can be manufactured. For assistance with your own particular requirements please contact us when your enquiry will be dealt with by our staff using the knowledge and experience available.
